The plants in this zine are all real, but they are all a little bit strange. Some of them are beautiful, while others are downright bizarre. But all of them are fascinating, and they all have a story to tell.

I hope you enjoy this zine. May it inspire you to look at the natural world with new eyes.

### Table of Contents

- Venus Flytrap
- Corpse Flower
- Hydrangea

- Mistletoe
- Sunflower

## Venus Flytrap

The Venus flytrap is a carnivorous plant that traps and digests insects. It has leaves that are lined with tiny hairs that are sensitive to touch. When an insect lands on a leaf, the hairs trigger the leaf to close, trapping the insect inside. The leaf then produces enzymes that digest the insect, and the plant absorbs the nutrients.

The Venus flytrap is a fascinating plant that is well-adapted to its environment. It is able to survive in nutrient-poor soils by trapping and

digesting insects. The Venus flytrap is also a beautiful plant, with its bright green leaves and delicate flowers.

Venus Flytrap Oh, Venus flytrap, with your leaves so green, And y

### Corpse Flower

The corpse flower is a rare and unusual plant that is native to the rainforests of Sumatra. It is known for its large, stinky flower, which can grow up to 3 feet in diameter. The flower smells like rotting flesh, which attracts insects that help to pollinate the plant.

The corpse flower is a fascinating plant, but it is also a very endangered plant. There are only a few hundred plants left in the wild, and they are threatened by habitat loss and poaching.

Corpse Flower Oh, corpse flower, with your petals so pale, And y

## Hydrangea

Hydrangeas are a genus of flowering plants that are native to Asia and the Americas. They are known for their large, colorful flowers, which can be blue, pink, purple, or white. The color of the flowers is determined by the pH of the soil in which the plant is grown.

Hydrangeas are beautiful plants that are popular for use in gardens and landscaping. They are also relatively easy to care for, making them a good

choice for beginner gardeners.

<u>Hydrangea</u> Oh, hydrangea, with your petals so bright, And your col

## Mistletoe

Mistletoe is a parasitic plant that grows on the branches of trees. It has evergreen leaves and white berries. Mistletoe is a popular plant for use in Christmas decorations, and it is often used in kissing rituals.

Mistletoe is a fascinating plant with a long history of use in folklore and medicine. It is a symbol of love and fertility, and it is often used in rituals to promote good luck and health.

<u>Mistletoe</u> Oh, mistletoe, with your berries so white, And your lea

## Sunflower

Sunflowers are a genus of flowering plants that are native to the Americas.

They are known for their large, yellow flowers, which can grow up to 12 inches in diameter. Sunflowers are a popular choice for use in gardens and landscaping, and they are also a
